

CSCE 361- Planning Poker Lab

Group Members: Pratik Pande, Justin Ahlers, Clara Perez

Epic with Two User Stories:

The screenshot displays the Jira interface for the 'PokerLab Team'. On the left sidebar, the 'Epics' tab is selected. The main content area shows an Epic titled 'Logging Into Grocery Store App' created by 'cperez12@huskers.unl.edu' 6 hours ago. The Epic description is '361 Lab'. It has no dependencies. Below the description, there are two issues listed: 'User Story #2' (PokerLab #2) with an estimate of 40, and 'User Story #1' (PokerLab #1) with an estimate of 100. On the right sidebar, the 'Epic progress' section shows '0 of 2 Issues' (0%) and '0 of 140 Epic points' (0%).

User Story 1:

The screenshot displays the Jira interface for the 'PokerLab Team'. On the left sidebar, the 'Epics' tab is selected. The main content area shows a User Story titled 'User Story #1 #1' created by 'cjewelperez' an hour ago. The User Story description is 'As a customer with dietary needs, I want to be able to see product details from home, so I can find foods that fit my diet without having to go to the store.' It has no dependencies. Below the description, there are two comments: one from 'cjewelperez' stating 'As a customer with dietary needs, I want to be able to see product details from home, so I can find foods that fit my diet without having to go to the store.' and another from 'cjewelperez' stating 'I want to be able to see product details from home, so I can find foods that fit my diet without having to go to the store.' On the right sidebar, the 'Pipelines' section shows 'PokerLab Team' and 'New Issues'. The 'Labels' section shows 'No Labels yet'. The 'Assignees' section shows 'No one - assign yourself'. The 'Sprints' section shows 'No sprint assigned'. The 'Estimate' section shows '100'.

User Story 2 (with additional task):

cjewelperez commented an hour ago

Edit ×

As a grocery store worker, I want to view and update inventory status efficiently to keep the shelves stocked with nonexpired items.

cjewelperez commented an hour ago

Edit ×

Task 1- As a manager, I want to see what items are expired, so I can remove them from the shelves.

Ex. See how many gallons of milk are expired so I can remove them,

ppande574 set the estimate to **40** minutes ago

Pipelines

- P PokerLab Team
 New Issues

Click the pin icon to assign high priority status. Once pinned, a high priority badge is applied in the issue and it's placed at the top of the pipeline in the board.
